

# You can't govern what you can't see. **Start with a list.**

How to find the AI your team already uses, and 5 steps to put one rule around it.

Jason Redfoot • Founder, Pragentic.ai

- 01 Ask, then check
- 02 Sort the tools
- 03 Write the one-page rule
- 04 Tell them what they can do
- 05 Recheck monthly

## WHAT THE DATA SAYS

# 78%

of AI users bring their own AI tools to work. At small and medium-sized companies, it's 80%.

Microsoft and LinkedIn, 2024 Work Trend Index.

# It isn't defiance. It's a gap.

People pick their own tools when nobody has said what's allowed. Then client notes, quotes, and emails can end up in free accounts nobody chose.

Do you know which AI tools your team uses today?

# 01

## Ask, then check

Send a no-blame message asking what AI tools people use and for what. Then confirm with your admin console, card statements, and browser extensions.

Try this: start with the connected-apps list in Google Workspace or Microsoft 365.

# 02

## Sort the tools

Every tool gets one answer: yes, yes with limits, or no.

Try this: one line per tool, with an owner.

# 03

## Write the one-page rule

Approved tools, the limits, what never gets pasted, and who to ask.

Try this: fill in the blanks, then pin it where people work.

# 04

## Tell them what they can do

Publish the approved list, not just the bans, and a fast way to ask for more.

| A ban with no alternative pushes tools out of sight.

05

# Recheck monthly

Ten minutes on the calendar. New tools appear constantly.

Try this: re-run the connected-apps check and ask what's new.

# Your Shadow AI **check:**

- ☐ Asked and checked
- ☐ Tools sorted
- ☐ One-page rule
- ☐ Team told what's OK
- ☐ Monthly recheck
