

SWIPE →

If your AI went dark for 4 hours, what would stop?

STEP 01 / 05

Map your AI dependencies

List every workflow that calls an AI tool: intake, quoting, support replies, scheduling, reporting.

04

STEP 02 / 05

Rank by blast radius

Separate what breaks for customers
from what just slows your staff down.

02

STEP 03 / 05

Keep a manual path

A written fallback for every customer-facing AI step. Test it once a quarter.

03

STEP 04 / 05

Don't single-source critical work

Line up a second model or vendor for
the workflows that can't wait.

04

STEP 05 / 05

Watch the status pages

Subscribe to vendor status alerts so you hear first, not your customers.

05

FREE · 1-PAGE RESOURCE

Get the AI Outage Playbook.

- An AI dependency map template
- A blast-radius scoring sheet
- Manual fallback scripts for common workflows
- A vendor status-alert checklist
